

Prof.dr. Alan Hanjalic

Alan Hanjalic is a professor of computer science at the Delft University of Technology (TU Delft), Delft, The Netherlands, founder and head of the Multimedia Computing Group and head of the Department of Intelligent Systems, one of the two TU Delft's Computer Science (CS) departments. He received his Ph.D. in 1999 from the TU Delft and his Diplom-Ingenieur (Dipl.-Ing.) degree in 1995 from the Friedrich-Alexander University in Erlangen, Germany, both in Electrical Engineering. He was a visited scientist and lecturer at several academic and industrial research institutes in Europe, United States and China.

Research interests and expertise of Prof. Hanjalic are in the fields of multimedia information retrieval and recommender systems, in which he (co)invented 1 patent and (co)authored and (co)edited more than 250 publications, among which the books titled *Image and Video Databases: Restoration, Watermarking and Retrieval* (Elsevier, 2000), *Content-Based Analysis of Digital Video* (Kluwer Academic Publishers, 2004) and *Online Multimedia Advertising: Techniques and Technologies* (IGI Global, 2010). The fundamental question Prof. Hanjalic is interested in is how to provide efficient, effective, intuitive and (socially) responsible access to and interaction with information stored in large (multimedia) data collections or available on social media platforms in a variety of use scenarios involving both search and recommendation.

Regarding **awards and honours**, in 2012, he was awarded the *Antoni van Leeuwenhoek Chair*, a full professorship appointment "reserved for the best young scientists at the Delft University of Technology" (quote: TU Delft). He is also co-recipient of the *Best Paper Award* at the ACM Conference on Recommender Systems (RecSys) 2012, the ACM International Conference on Multimedia 2017 and the IEEE International Conference on Multimedia Big Data 2019 (BigMM). He also received the *Multimedia Grand Challenge Award* at the ACM Multimedia 2015 and the *Overall Winner Award* at the ACM RecSys 2010 CAMRa Challenge. In 2016, he was named *IEEE Fellow* for his contribution to the field of multimedia information retrieval.

Prof. Hanjalic has been involved in the **management of major scientific journals** in the multimedia field. He was the Chair of the Steering Committee of the IEEE Transactions on Multimedia (2014-2016) and the Associate Editor-in-Chief of the IEEE Multimedia Magazine (2014-2017) in charge of Special Issues. He was an elected member of the IEEE Image, Video, and Multidimensional Signal Processing Technical Committee (2015-2017) and of the IEEE Technical Committee on Multimedia Signal Processing (2011-2013). Furthermore, Prof. Hanjalic served as a member of Editorial Boards of the major scientific journals, among which the IEEE Transactions on Multimedia (2006-2014), the IEEE Transactions on Affective Computing (2010-2016), the ACM Transactions on Multimedia (2015-2017) and the Springer International Journal of Multimedia Information Retrieval (2011-2017). In addition, he was a Guest Editor of eight special issues in the leading journals in the field of multimedia, including the Proceedings of the IEEE, the IEEE Transactions on Multimedia, the IEEE Transactions on Affective Computing and the IEEE Multimedia Magazine.

He has served on the **organizing committees of all major conferences** in the multimedia field, including the ACM Multimedia Conference (General Chair 2009 and 2016, Program Chair 2007 and 2014), IEEE ICME (Program Chair 2012 and 2013), ACM CIVR/ICMR conference (Program Chair 2008 and 2011). He has also been a Senior Program Committee member of ACM RecSys conference regularly since 2015. Prof. Hanjalic was an **invited (keynote/plenary) speaker** at several international events, among which the IEEE International Workshop on Multimedia Signal Processing (IEEE MMSP) 2013, the International Conference on Multimedia Modeling 2012, and at the Pacific-Rim Conference on Multimedia 2007.

As **department head**, he has provided leadership to 250+ scientific and support staff members. His focus has been on creating strategic and financial framework for the department to grow substantially in terms of faculty members (from 31 in 2018 to 50 in 2025) in order to optimally contribute to the education of 2500 CS students. Furthermore, he has focused on organizing appropriate housing for the rapidly growing scientific staff, on modernizing the CS tenure-track system and increasing the gender diversity. Finally, he improved the conditions for the new faculty members to start out and develop towards higher academic ranks.
