# Installing a printer on your own computer

## Before you begin.

The following instruction is supported by the TU Delft and has been tested to be working. We are offering this manual to you as an extra service. In the event you have a different configuration or version of **WINDOWS 7** other than the one described here and you have problems **installing a FollowMe printer**, neither ICT & FM nor a Service Desk will be able to help you to install your printers.

## Prerequisites

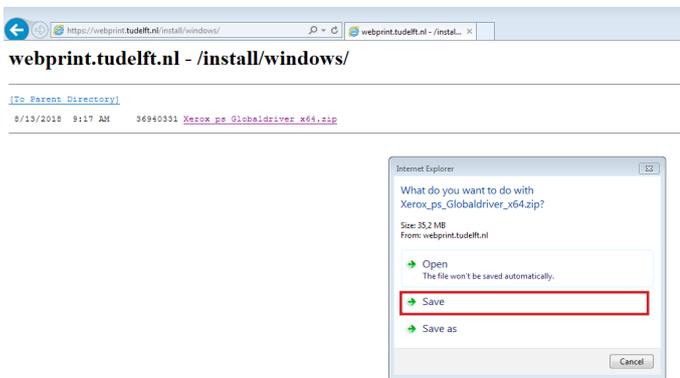

In order to **connect to the printer servers**, make sure that you are connected to the TU Delft Network (wired or wireless).

This manual contains four steps to install the printer on your own device. Make sure you carry out every step:

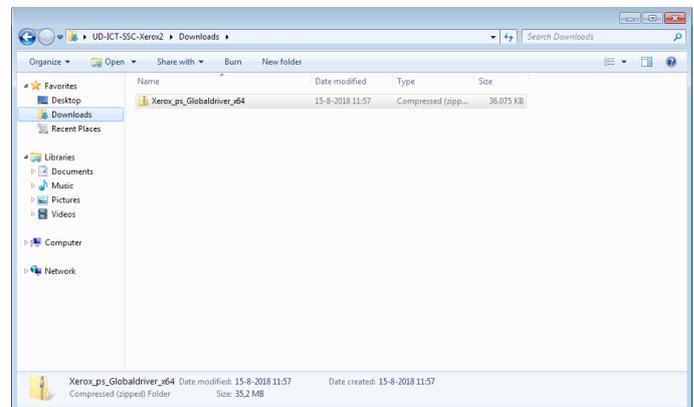

1. Download driver
2. Install the printer
3. Check driver settings
4. Set defaults

## 1. Download the driver

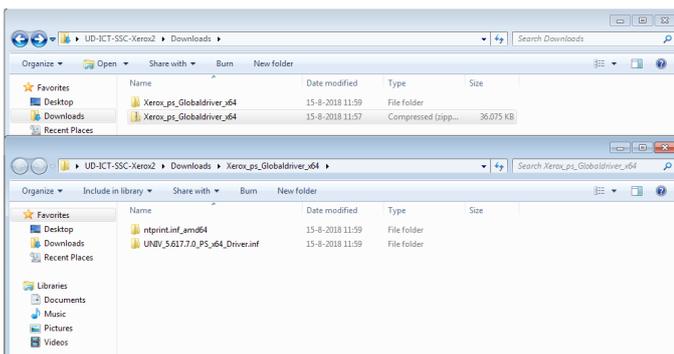

Step 1. Download the driver on:  
<https://webprint.tudelft.nl/install/windows/>

Step 2. Click "Save".  
In this example the file is stored in the download folder

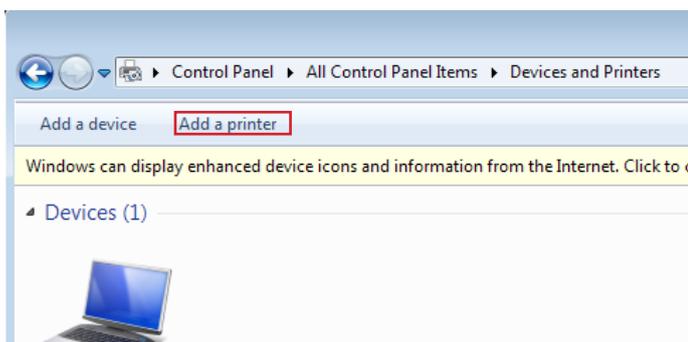

Step 3. Unzip the Driver. In this case the file is un-zipped in the download folder

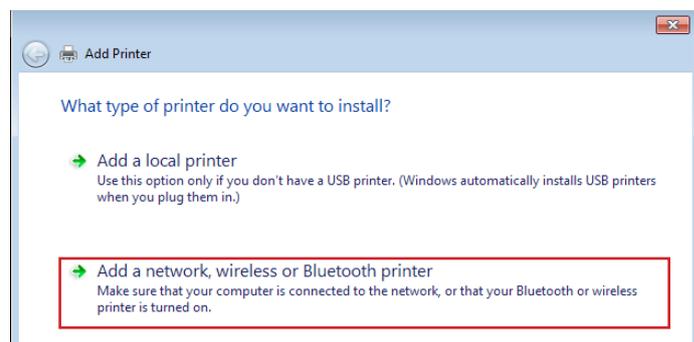

## 2. Install the printer

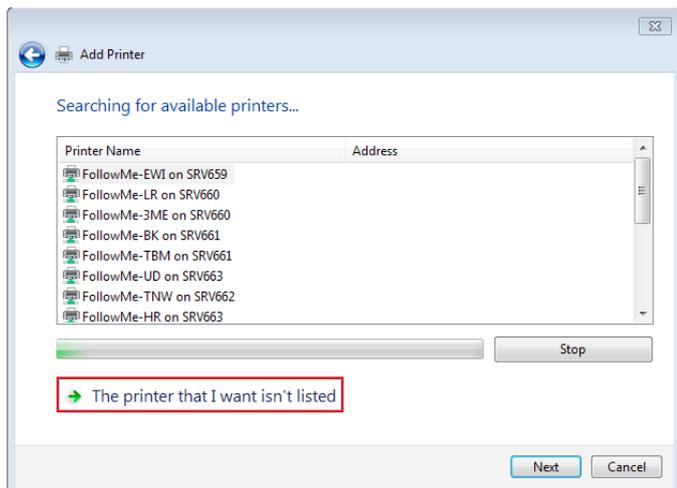

Step 1. Go to start => Control panel => Devices and Printers. Choose add printer.

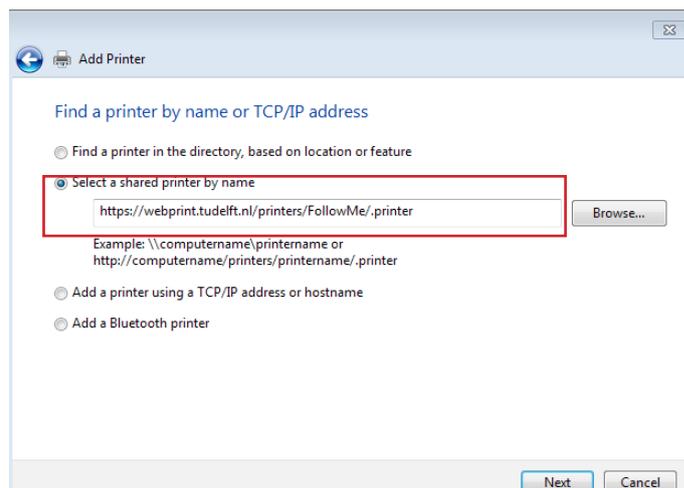

Step 2. Choose "Add a network ... printer" and click next.

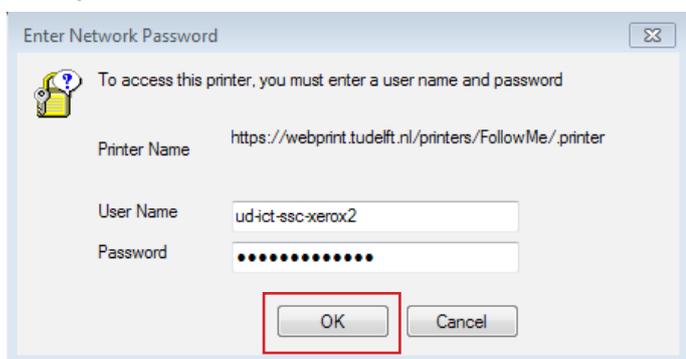

Step 3. Click "The printer that I want isn't listed" and click next.

Step 4. The screen below appears. Fill the field "Select a shared printer by name" with the text: `https://webprint.tudelft.nl/printers/FollowMe/.printer` Click "Next".

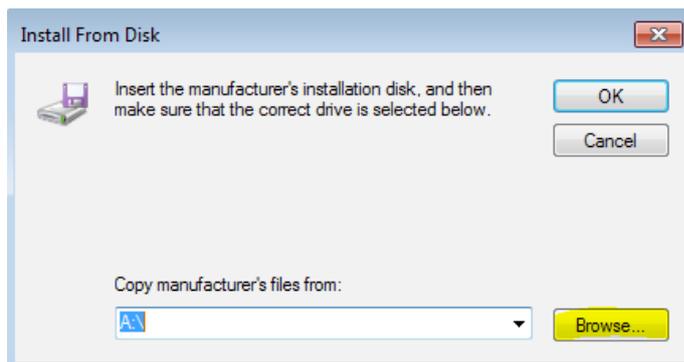

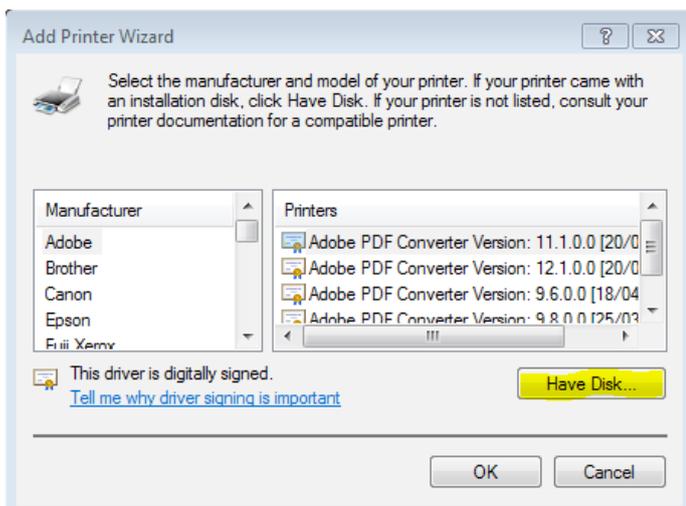

Step 5. The authentication screen appears. Fill in your own NetID and password and press "OK". The printer is added to your computer. Please check driver settings (see below).

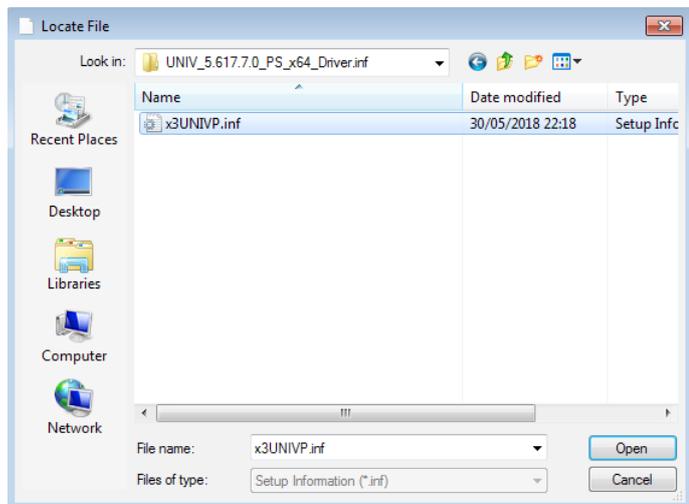

If you installed this printer before, you will not see the next steps, go to 3. Configure the printer driver

Step 1. The Add Printer Wizard appears, click "Have Disk..."

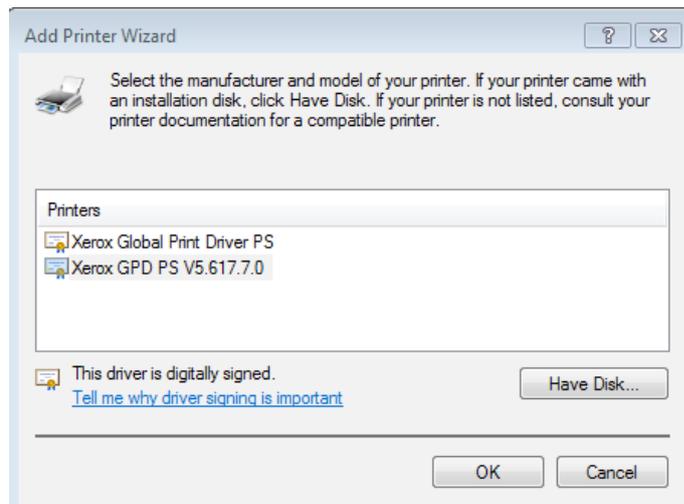

Step 2. The Install From Disk appears, click "Browse..."

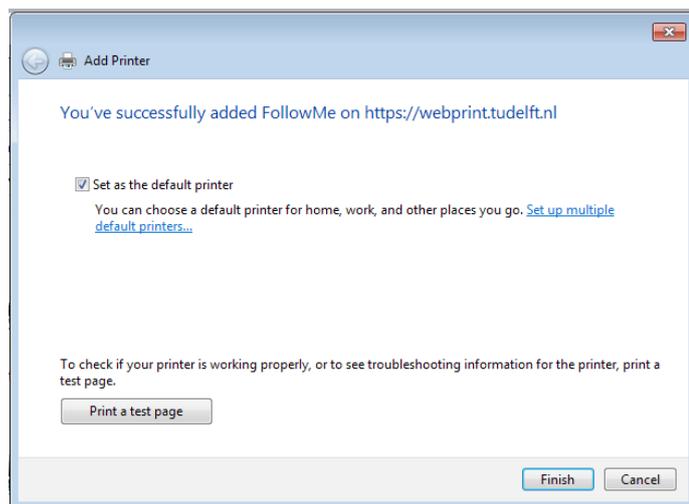

Step 3. The "Locate File" screen appears. Browse in the field "Look in:" to the unzipped location of the downloaded driver. (If you downloaded and unzipped to the default folder the path is: C:\Users\your\_netid\Downloads\Xerox\_ps\_Globaldriver\_x64\UNIV\_5.617.7.0\_PS\_x64\_Driver.inf). Click on x3UNIVP.inf and click "Open".

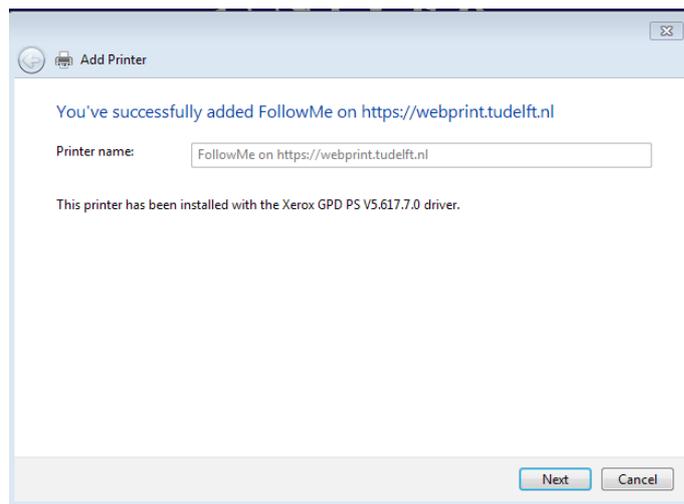

Step 4. You will come back in the Add Printer Wizard menu. Choose "Xerox GPD PS V5.617.7.0" and click "OK"

Step 5. Press "Next"

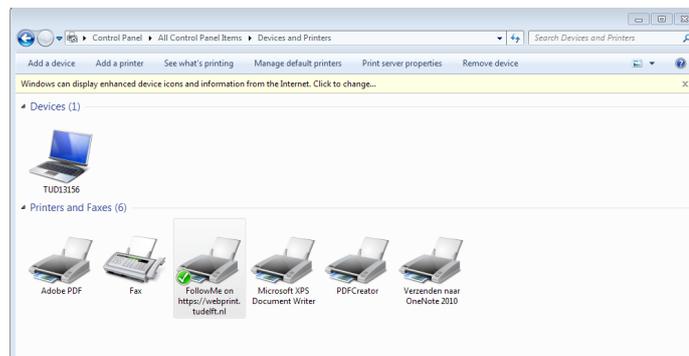

Step 6. Press "Finish".

### 3. Configure the printer driver

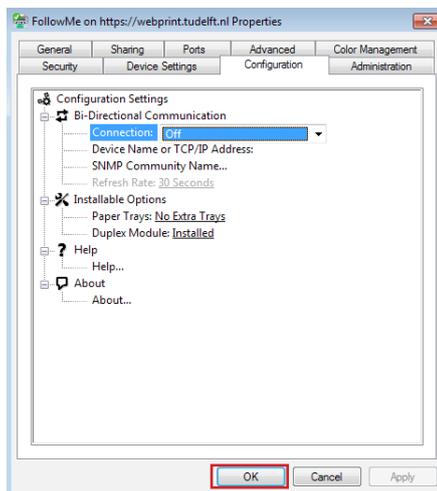

Step 1. After adding the printer you must configure the driver.

Go to start => Control panel => Devices and Printers

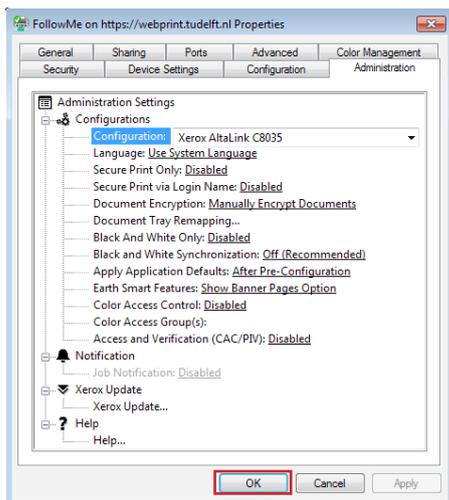

Step 2. Right click on the printer and open printer properties.

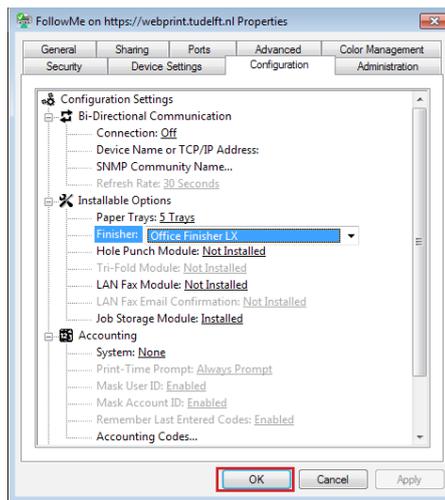

Go to the TAB Configuration and set Bi-directional communication to off en click "OK".

Step 3. Open the Printer properties again and go to the TAB Administration and set the configuration to Xerox Altalink C8035 and press "OK".

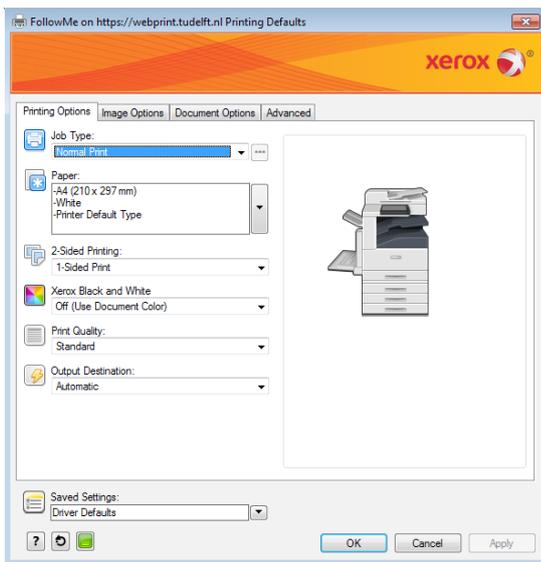

Step 4. Open the Printer properties again and open the TAB Configuration again. Set the finisher option to Office Finisher LX and press "OK".

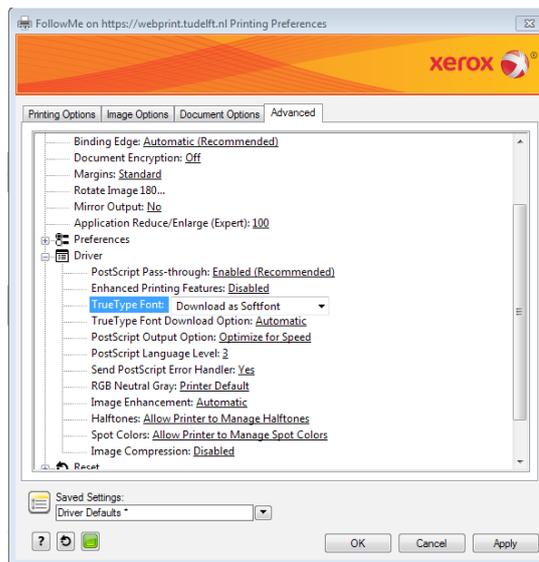

#### 4. Set your printing defaults

Step 1. In the Devices and Printers right click on the printer FollowMe on https://webprint.tudelft.nl again and open "Printing preferences". In this screen you can set the printing defaults. For example 2-sided printing or Default Black White printing.

Step 2. Select the tab "Advanced", expand "Driver" and change the line "TrueType Font" from "Substitute with Device Font" in "Download as Softfont".

Success with printing now.
