Connect to TUvisitor via wired TU network

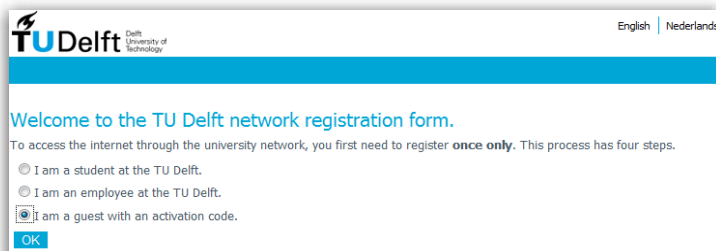

1. Introduction

In this manual you can read how to gain internet access to TUvisitor via the wired TU network with your laptop and using a network cable. Before you can connect you will need to complete a simple one-time registration. Registration is very easy.

2. Access to the network

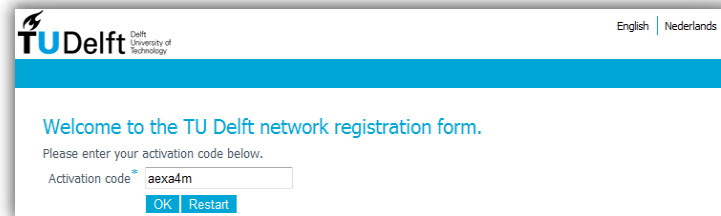

1. Plug the network cable into your laptop and a network connection labelled **ACTIVE**, in the wall or floor.

3. A welcome screen will appear. Select that kind of user you are and click **OK**

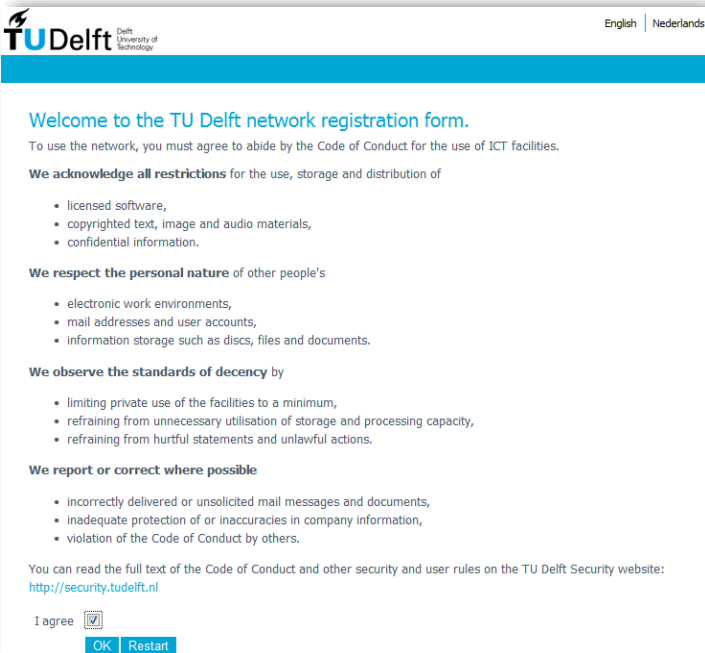

2. Connect to the internet using your internet browser.

4. Fill in your activation code and click **OK**. (If you don't have an activation code, please contact your host at the TU Delft. Your host can create an activationcode for you).

5. Read the license agreement carefully. If you are agree, check this at the bottom of the page and click **OK**.

6. The following screen appears. Read the opinions carefully. It may take a few minutes before your registration is active and you can access the network.
