

Android 9

Eduroam
Android 9 (Fairphone)

For use by:	Students, Employees
Version:	1.0
Date:	04-05-2020
Owner:	SID-LIB / ICT

Connecting to the 'eduroam' network on Android 9 on a Fairphone.

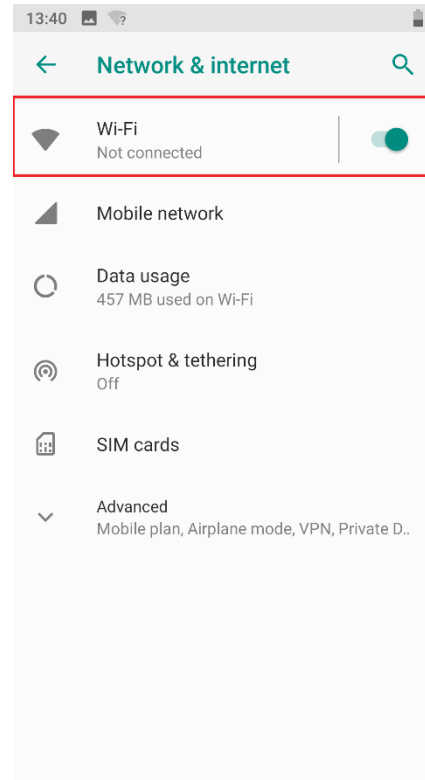

Before you begin

The following instructions are supported by TU Delft and have been tested to be working. We are offering this manual to you as an extra service. In the event you have a different configuration or version of Android than 9 or lower, or a different type of phone than Fairphone and you have problems connecting, we advise you to contact your nearest Service Desk, Student IT Desk (SID) or Workplace services (WPS).

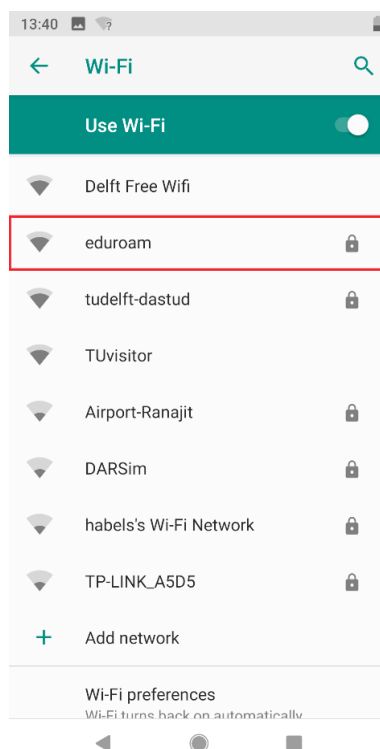

Connecting your Android phone or Android tablet to eduroam

Step 1. Go to the **Settings** app and tap **Network & internet**.

Step 2. Tap **Wi-Fi**.

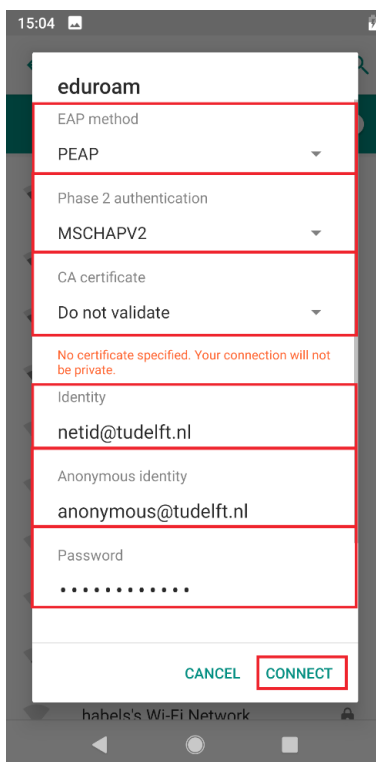

Step 3. Tap **eduroam**.

Step 4: Enter the following settings:

- Set the EAP method to **PEAP**
- Set the Phase 2 authentication to **MSCHAPV2**
- Set the CA certificate to **Do not validate**
- Enter your identity: **netid** with **@tudelft.nl**
(note: this is **not** your email address!)
- Anonymous identity: **anonymous@tudelft.nl**
- Enter your **netid password**

Then, tap **CONNECT**

Step 5: You are now able to use the eduroam network if you are in range.
