

Mentor guide for MAP registration Spring 2022

Step 1: Read the MAP mentor webpage carefully: <https://www.tudelft.nl/lr/business-portal/alumni/mentor-alumni-programme-map>.

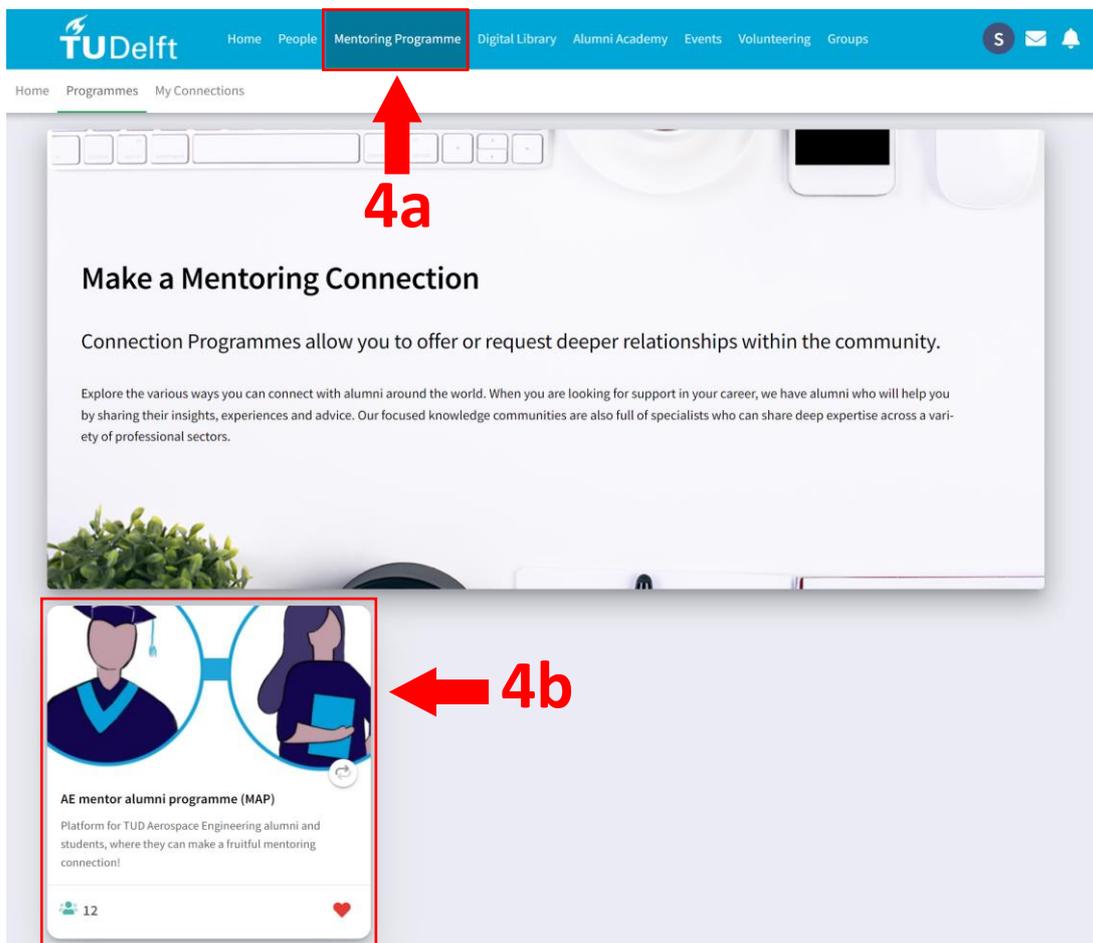

Step 2: Click on the registration button and apply by completing the form. Since this a pilot of MAP in the alumni portal, we use this extra registration step to double-check that we do not lose anyone in the process.

NOTE: After applying, your registration is not finished yet! More steps are to be completed in the alumni portal www.tudelftforlife.nl.

Step 3: Shortly after filling in the registration form, you should receive an e-mail about the *TU Delft for Life* alumni portal. In this e-mail, you can find a link to the MAP environment. Please log in to your personal account or create one at www.tudelftforlife.nl.

Step 4: Register for the AE MAP environment (see steps below). The details you enter here, are now linked to your TU Delft for Life account. You can update them anytime.

- 4a. Go to *Mentoring Programme* navigation pane at TU Delft for Life.
- 4b. Select the *AE mentor alumni programme (MAP)* module.
- 4c. In the MAP module, select *Join as MAP Mentor*. A registration pop-up will appear.
- 4d. Complete your MAP registration and press *Finish* afterwards.

AE mentor alumni programme (MAP)

The AE Mentor Alumni Programme (MAP) connects Aerospace Engineering alumni as mentors to AE students. Alumni use their valuable experience to advise and coach students and discuss their study paths, ambitions and future careers.

For alumni, this is an opportunity to give something back to their former faculty, strengthen their coaching and advising skills and connect to the innovative thinking of ambitious and bright students outside of their current working environment. It might also be a good way to connect to your possible future colleague and create exposure for your current employer.

For students, the MAP platform provides them with an ideal sparring partner, with whom they can discuss their current challenges and their plans for their professional future. Besides the personal development track, students can straightforwardly work towards specific goals such as job/internship applications.

We are excited to see that this programme, that started in October 2016, has already resulted in over 900 students being inspired by over 400 alumni and keeps on growing every year.

Step 5: Accept or decline a connection request from an AE student between 21 February and March 6th. Students are asked to motivate their connection choice and are encouraged to send their MAP objectives to you. The connection request will show in the inbox in the portal, and it will be forwarded to your personal e-mail address. If you decline a connection request, please also motivate your action to the student.

NOTE: Only if you have accepted a request at some point, you are part of the programme! Make sure to monitor your inbox a little between 21/02 and 06/03.

After you have established a connection with your MAP mentee, you can both decide which communication platform suits you best. You could use the chat function of TU Delft for Life, or any other platform of your preference.

For remaining questions, you can always contact AEmentor-alumni@tudelft.nl.
