For use by: Students, Employees  
Version: 1.0  
Date: 20-11-2020  
Owner: SID

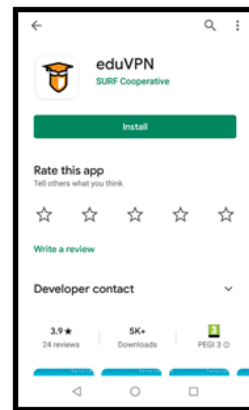

## 1. Install eduVPN via the Play Store

Step 1.1: Open the PlayStore on your phone

Step 1.2: find eduVPN

Find 'eduVPN' in the store and click 'install'

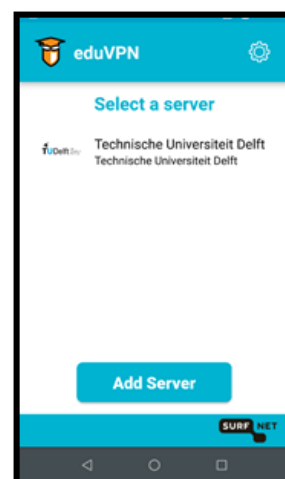

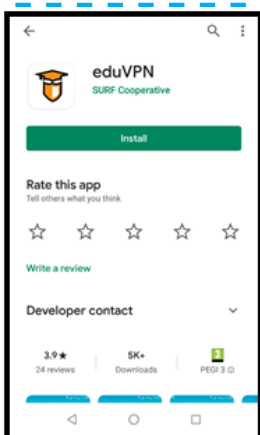

Step 1.3: Open eduVPN

Open eduVPN after download.

Step 1.4

Tap the server 'TU Delft'.

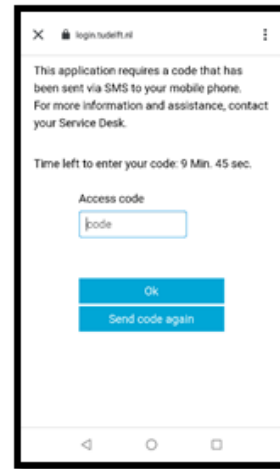

### Step 1.5: Log In

Log in with your NetID and password.

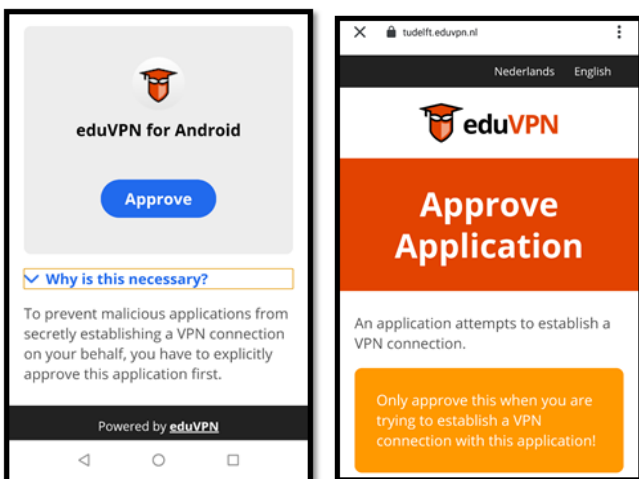

### Step 1.7: SMS authentication

An SMS is sent to your mobile phone number. Enter the code and tap 'Ok'. (Make sure your mobile phone number is known in e-service.tudelft.nl)

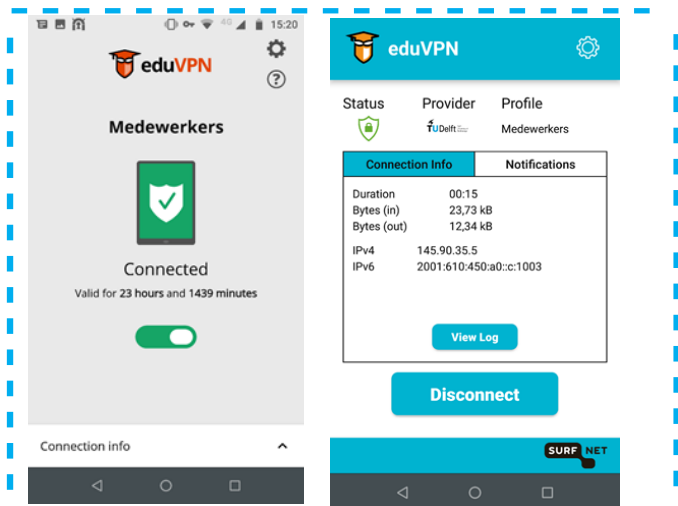

### Step 1.8: Allowance

The next screen will appear: click on 'approve' to allow the the VPN to connect.

### Step 1.8: eduVPN is connecting

eduVPN is now connecting. When this has been successfully completed, a green symbol appears.

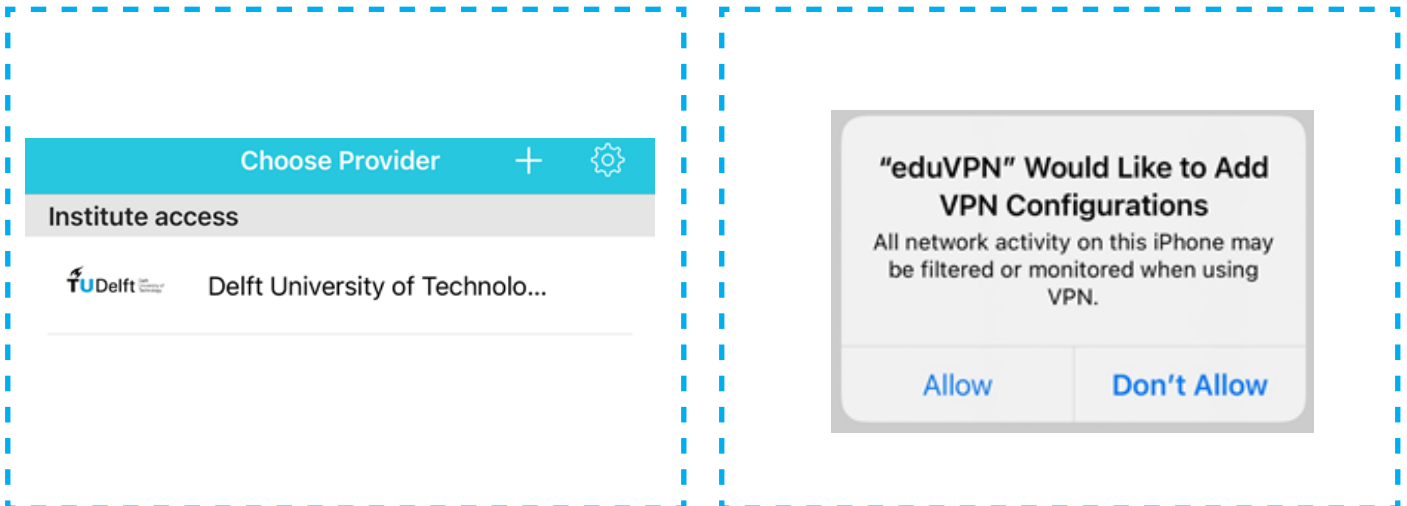

### Step 1.9: Choose Entry

In the VPN client you will now see a "Delft University of Technology" entry, please click this entry to make a VPN connection

### Step 1.10:

Please allow the application to add the VPN connection to your iPhone.

When all steps are done successfully you should see this message:

You are now connected with eduVPN
