

Thunderbird
mailbox
setup (IMAP)

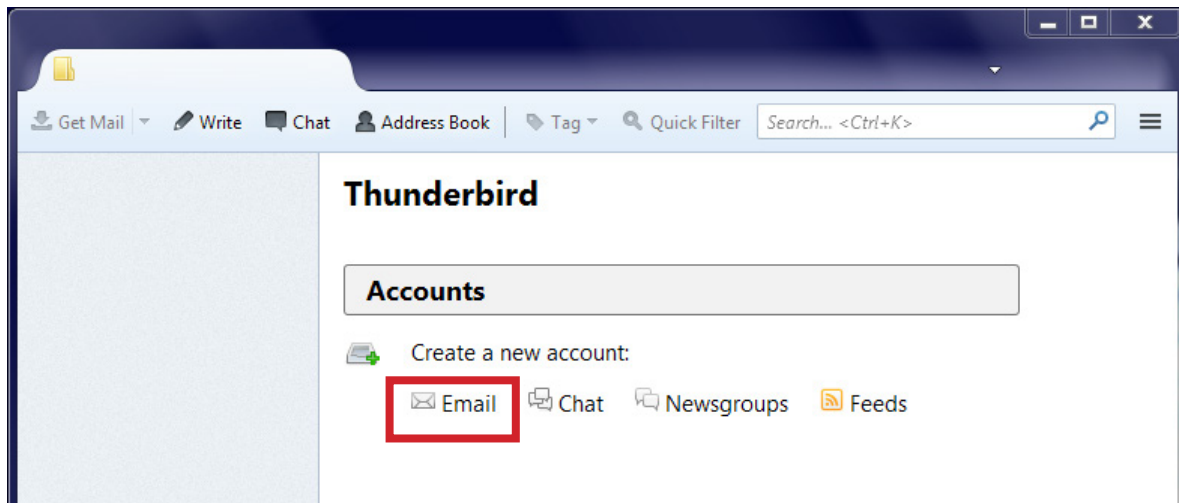

For use by: Students, employees and guests
Version: 2.0
Date: 18-11-2013
Owner: @hok

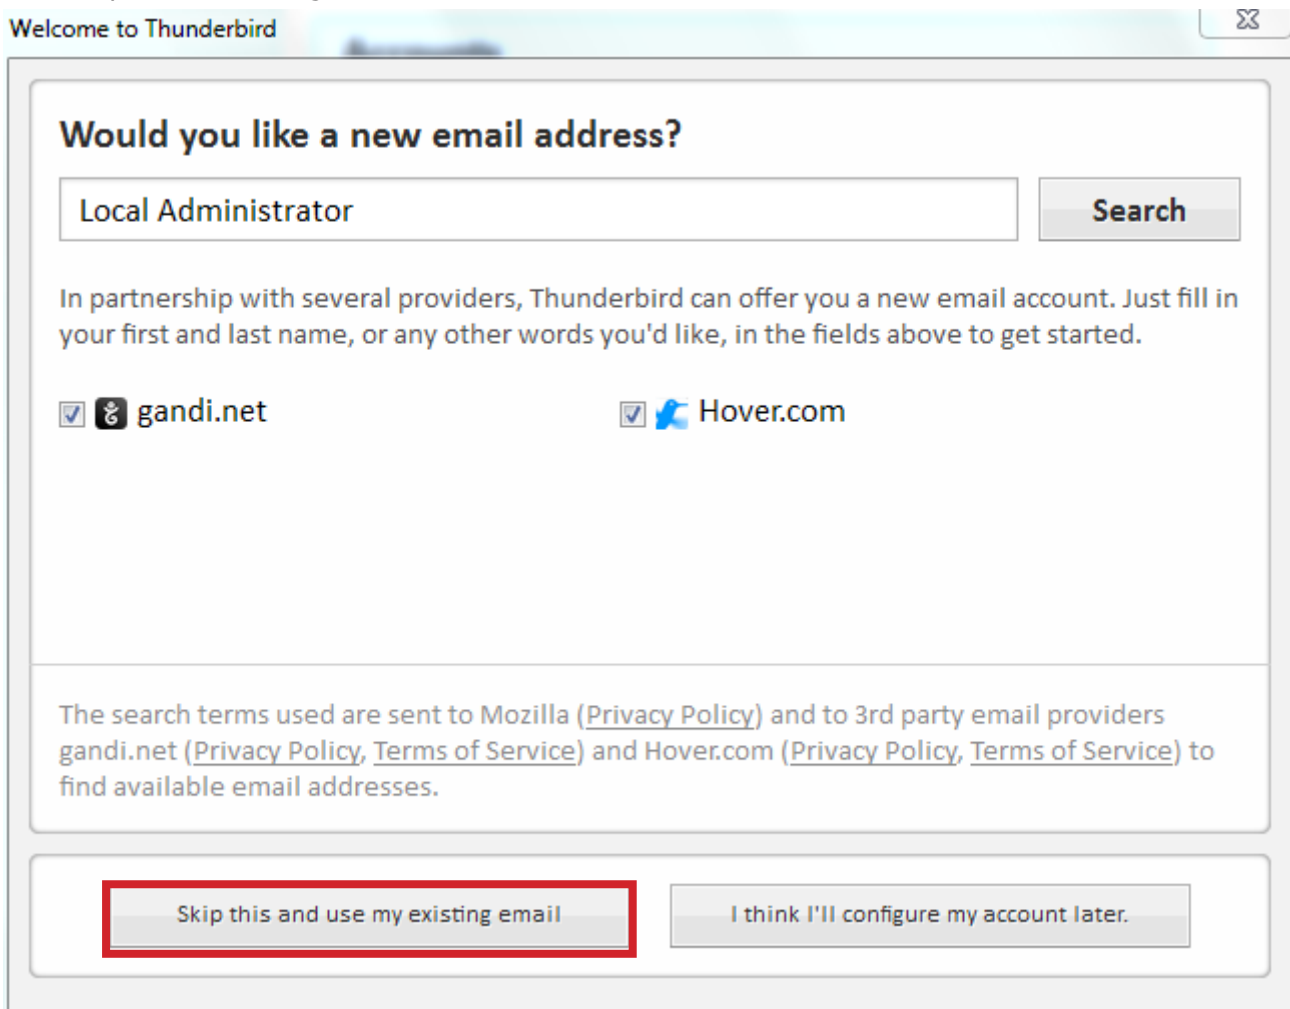

Before you begin

This manual assumes you have Thunderbird installed and up and running. It only deals with adding mail-accounts to your Thunderbird program.

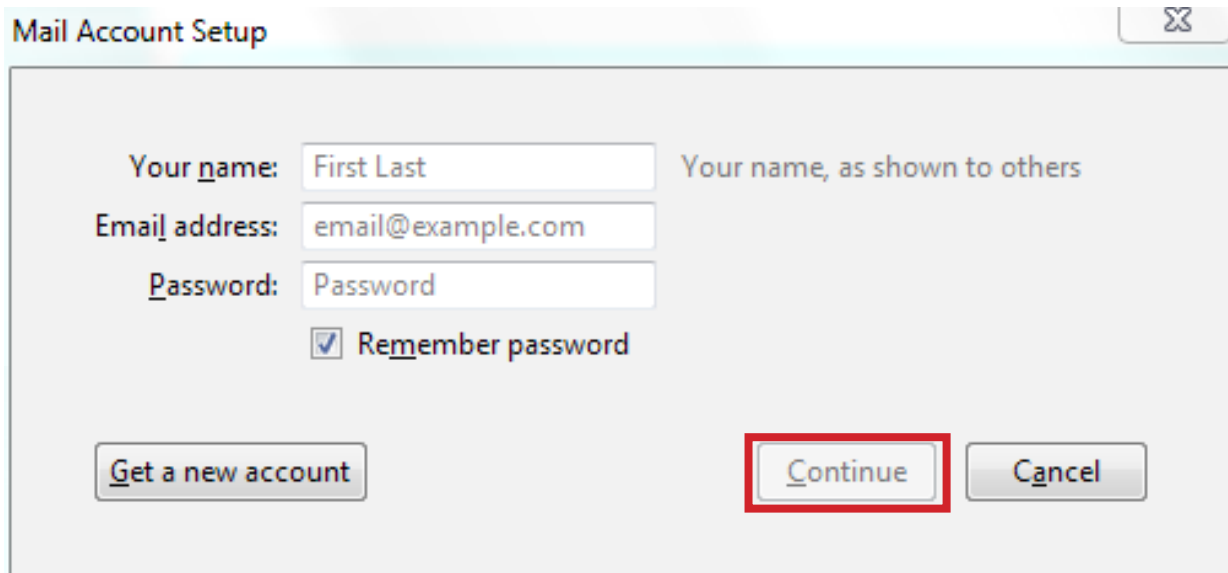

1. Open Thunderbird.
2. Click "E-Mail" under "Create new account".

3. Ignore the "new email address field".
4. Click "skip and use existing account".

5. Enter your information in the correct fields.
6. Click continue

Mail Account Setup

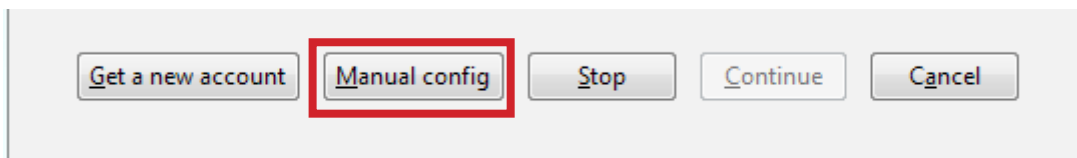

Your name: Your name, as shown to others

Email address:

Password:

Remember password

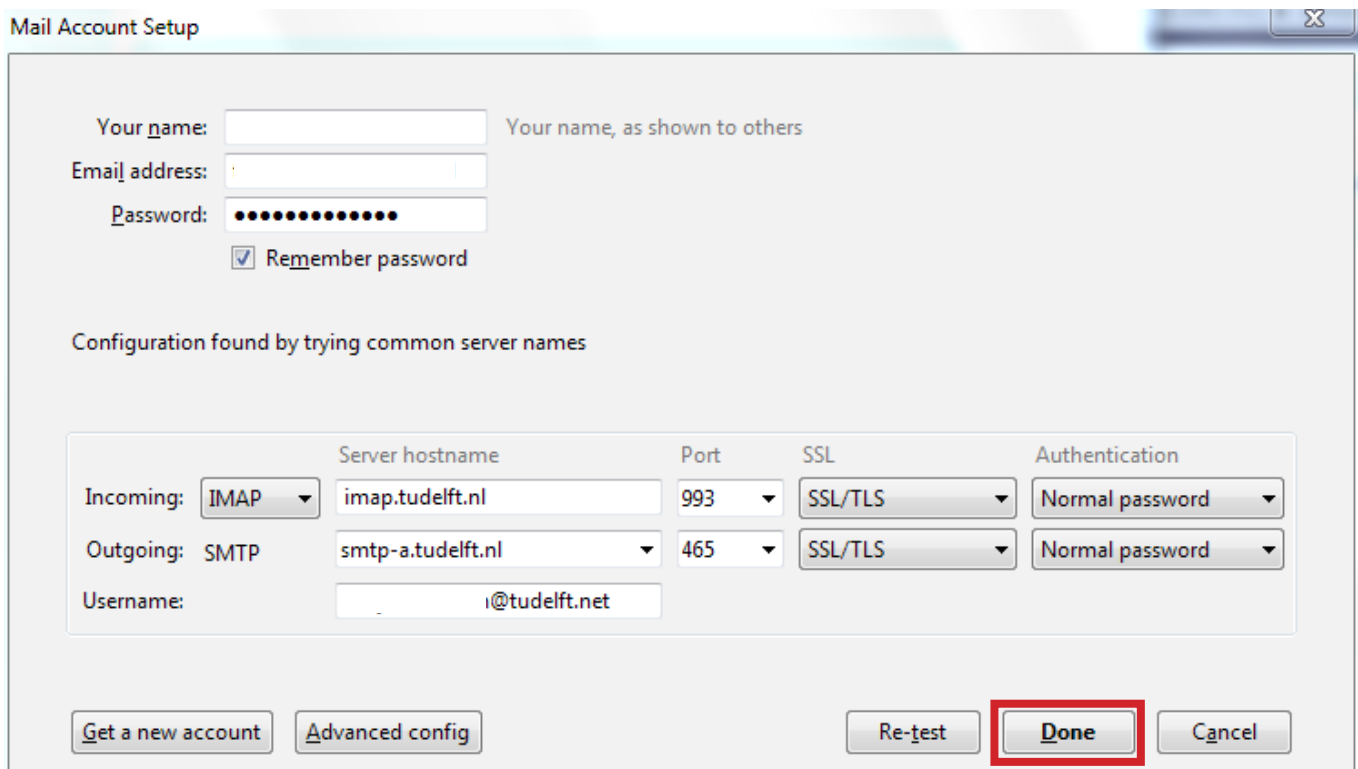

7. Click "Manual config"

8. Enter the information in the fields as shown:

Your name
Email address and Password
Incoming: imap.tudelft.nl port:993 SSL/TLS Normal password
Outgoing: smtp-a.tudelft.nl port:465 SSL/TLS Normal Password
Username **Netid@tudelft.net**

9. Click "Done"

Mail Account Setup

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Configuration found by trying common server names

	Server hostname	Port	SSL	Authentication
Incoming: <input type="button" value="IMAP"/>	<input type="text" value="imap.tudelft.nl"/>	<input type="button" value="993"/>	<input type="button" value="SSL/TLS"/>	<input type="button" value="Normal password"/>
Outgoing: <input type="button" value="SMTP"/>	<input type="text" value="smtp-a.tudelft.nl"/>	<input type="button" value="465"/>	<input type="button" value="SSL/TLS"/>	<input type="button" value="Normal password"/>
Username:	<input type="text" value="i@tudelft.net"/>			

You have now added a new mailbox to the Thunderbird program. You will be able to reply to emails sent to the email account. Sent emails will also appear in your mailbox.
