Configure the Exchange mailbox on iOS 13

Use this manual to configure a functional mailbox on an iOS device such as an Ipad or Iphone

Before you begin

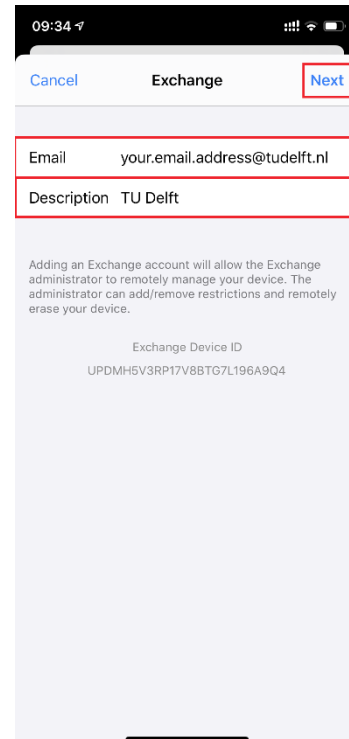

The following instructions are supported by TU Delft and have been tested to be working. We are offering this manual to you as an extra service. In the event you have a different configuration or version of iOS to the one described here and you have problems connecting, we advise you to contact your nearest Service Desk, Student IT Desk (SID) or Workplace services (WPS).

Description of the steps that have to be taken

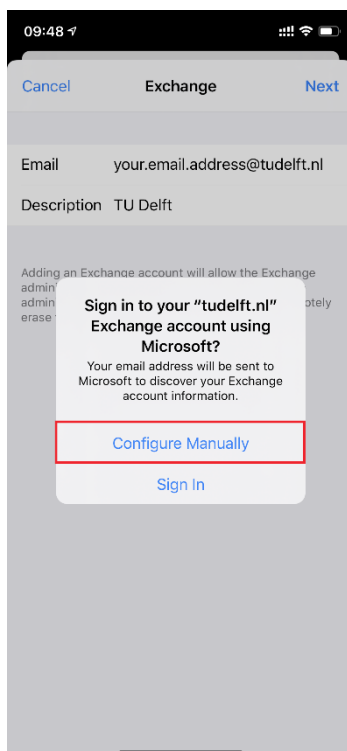

Step 1. Go to the **Settings** app. Tap **Passwords & Accounts**. Tap **Add Account**. The following screen appears. Select **Microsoft Exchange**.

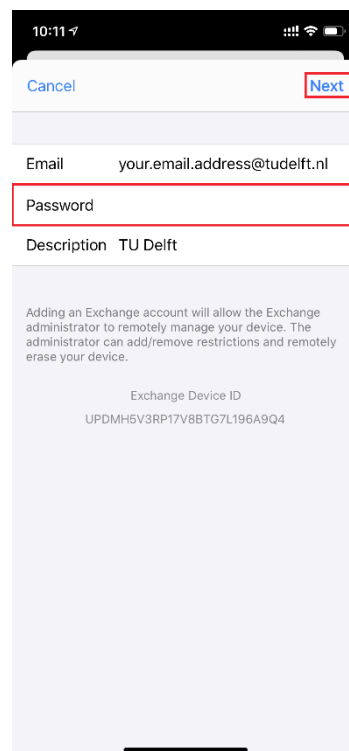

Step 2. Enter your TU Delft **e-mail address** and choose a **Description**. Tap **Next**.

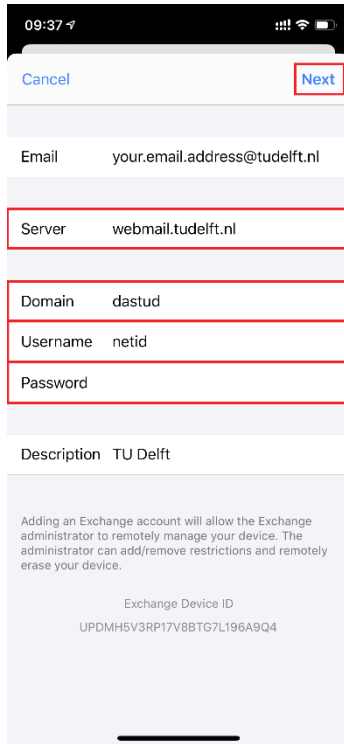

Step 3. Tap **Configure manually**.

Step 4. Enter your **password** and tap **Next**.

- Step 5. Enter the following details:
- Server: **webmail.tudelft.nl**
 - Domain: **dastud**
 - Username: **your NetID**
 - Password: **your password**
 - Tap **Next**

- Step 6. Select the services you would like to use and tap **Save**. Your selected services will now sync. Note: this may take some time.
