Configure the Exchange mailbox on iOS 13

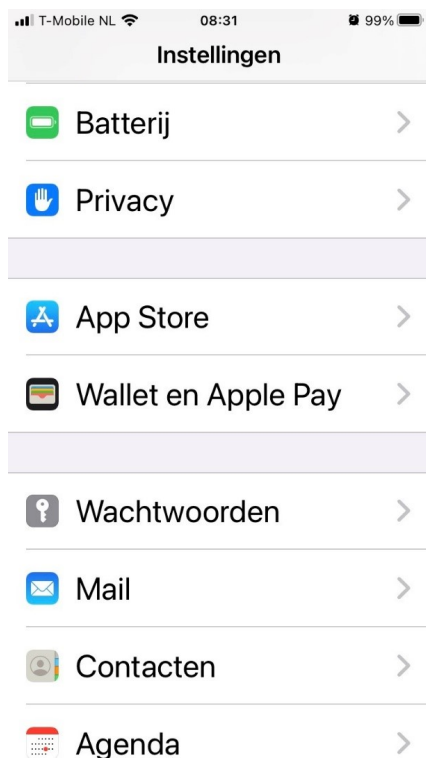

Use this manual to configure a functional mailbox on an iOS device such as an Ipad or Iphone

Before you begin

The following instructions are supported by TU Delft and have been tested to be working. We are offering this manual to you as an extra service. In the event you have a different configuration or version of iOS to the one described here and you have problems connecting, we advise you to contact your nearest Service Desk, Student IT Desk (SID) or Workplace services (WPS).

Description of the steps that have to be taken

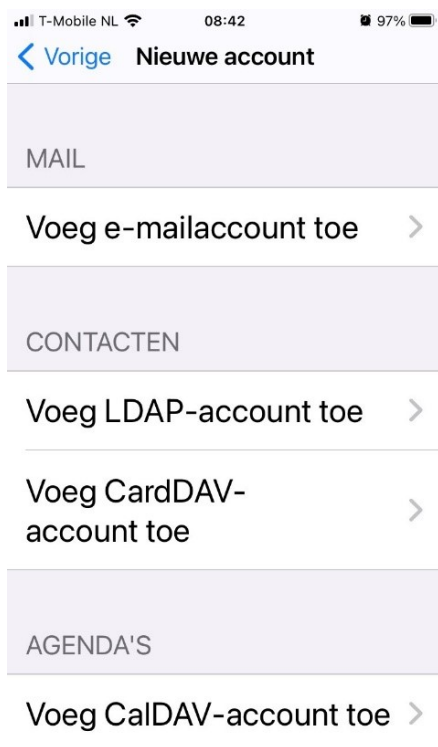

Step 1. Go to the **Settings** app, click **Mail**.

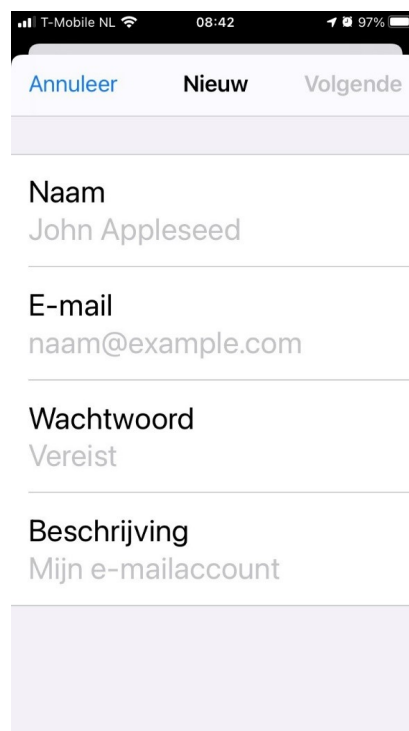

Step 2. Click on **Accounts**, click on **Add Accounts**, click on **Other**

Step 3. Click on **Add Mail Account**

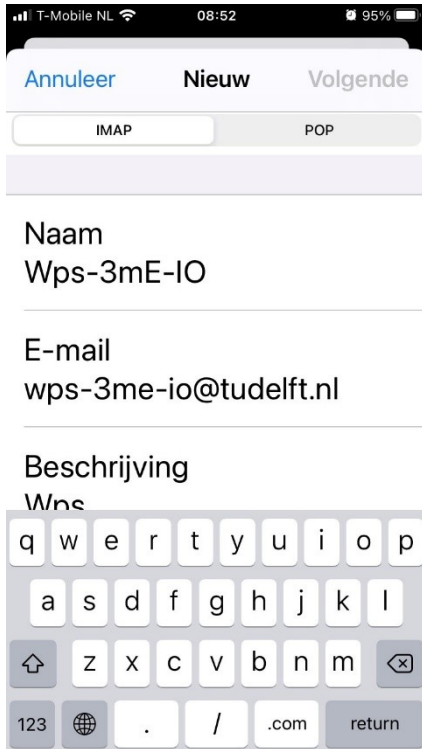

Step 4. Enter the **name** of the functional mailbox, enter the **e-mail adres** of the functional mailbox, enter YOUR **NetID password**, and add a **description**.

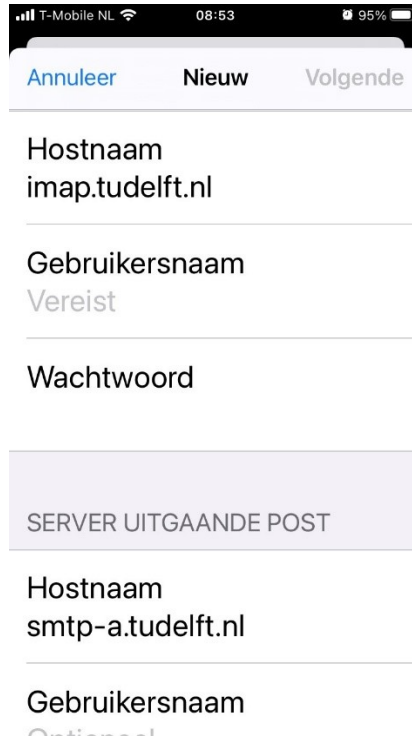

Step 5 & 6 Enter the following details:

- **Server incoming post**
- Hostname: imap.tudelft.nl
- Username: netid@tudelft.nl\functional_name
- Name: functionele mailbox
- Password: van eigen netid

- **Server outgoing post**
- SMTP: smtp-a.tudelft.nl
- Username: netid@tudelft.net
- Password: of your NetID

Step 7. Check the following:

- Check the server of outgoing post:
- That SSL is selected
- That Port 587 is selected

Step 8.

mailbox is ready for use.
