Downloading, installing and managing Connected Backup on Mac

!!!!This is a manual intended for Mac operating users.

Backup configurations.

!!! Be aware you can only use one type of configuration per computer. If you downloaded/activated the wrong configuration or you want to change to a different configuration you have to apply again for a Connected Backup account, for this you have to contact your faculty Service Desk.

!!!If you want to change the Connected Backup account to another computer you have to contact your faculty Service Desk.

Types of backup configurations:

TU configuration (is intended for all types of computer users)

This configuration is not fully configurable. Some folders are set to be backed up by default and cannot be edited. Some file types are excluded such as music and movie files.

Standard configuration (is intended for advanced computer users only)

This configuration allows the user to set which files and folders are to be backed up. By default nothing will be backed up, the user has to choose the desired files and folders.

Account registration

You can download Connected Backup from: www.tudelft.nl/connectedbackup

1. Click in the left side menu on "Register".

2. Select for the Mac platform one of the desired backup configuration. !!! See more information above.

Software download

3. Click on "Register and Download".

4. Enter your NetID and password and then click on "Continue".

5. Check if the provided information is in order and click then click on "Download Software".

6. Click on "Begin Download".

Software installation

7. Open the downloaded "AgentSetup.mpkg".

8. Click "Continue".

9. Click "Agree".

10. Make sure your system drive is selected and click "Continue".

11. Click "Install".

12. Fill in your information and click "Install Software".

13. Click "Close".

14. Allow "Incoming connections" for the application "AgentService".

15. Click "Close".

Software managing : Backing up

16. Start the software "Connected Backup". You will be asked to fill in the password for your NetID. Afterwards click "Ok".

17. After the program has finished scanning your hard disk drive you will be able to start back up your files. Note! This process might take a while. After you selected the desired documents you can click on "Back Up Now".

Software managing : Retrieving a backed up file/folder

18. If you desire to retrieve a file or folder you have to click on "Retrieve". Afterwards chose the file or folder that you want to retrieve from the "Backed Up Files" menu.
