Spring Semester 2021

Tutors

Roberto Cavallo (Architecture)
Maurice Harteveld (Urban Design)
Steven Steenbruggen (Architecture)
Victor Muñoz Sanz (Urban Design)

Responsible Instructors

Roberto Cavallo
Maurice Harteveld

Code	AR0167
Credits	15 ECTS
Location	Rotterdam and another Dutch city
Excursion	yes (if conditions in 2021–Q4 allow)
Costs	—
Project type	Multidisciplinary
Approved Master 2 Architecture Design Project	Yes

collaboration:

Massive urbanisation puts pressure on public space and demands a variety of forms of collective spaces that cannot be planned in advance. Mobility and public life manifest themselves in various forms as carriers of urban development. Interventions in the city need constantly to be grounded on sharp design approaches in order to respond adequately to the necessities of our times. This design studio is about *city making at times of transitions*.

Designs will envision how to work with continuously changing urban conditions: how mobility transforms the city and public space can take various forms, how programmes hybridise, and how the underground relates to the above ground.

In this interdisciplinary design studio, you combine these issues and present them to your peers and a team of interdisciplinary supervisors. You focus particularly on the consequences of urbanization for the major foundations of the city of the future—urban infrastructure and public space—and you envision an experimental design, within a larger set of visions produced by your fellow students.

In this course, students and staff are interested on one hand to the urban intervention in the built environment and its effect on architecture. And at the other hand, on the basis of particularly the cross-section, at the architectural treatment of the city and its effect on the context of the urban fabric and landscape.

This course is open to students of the Master's tracks of Architecture, Urban Design and Landscape Architecture. If you are in a different track: please consult the track coordinator before enrolling.

The studio includes the interdisciplinary lecture series People, Movement and Public Space which provides an overview of vested theories and cutting edge research on people movement, urban vitality and public space (AR0551).

Students in this studio will interact with a BNA (Royal Institute of Dutch Architects) and DIMI (Delft Deltas, Infrastructures & Mobility Initiative) project, involving also professionals from various fields.
