

INTERNSHIP INDUSTRIAL PRODUCT DESIGN

PERIOD: CONTINUOUSLY

Are you packed with great creativity, innovative ideas and endless imagination? Do you have a good sense for design and styling? Are you eager to grow your skills and discover your professional potential?

In our headquarter in Breda, there are empty desks waiting to be used & challenging projects looking for designers!

Studio Mango is a full-service design agency based in Breda (The Netherlands) and Hong Kong. We develop products and concepts from first sketch to producible product.

As design intern you will be involved in different phases of several innovative projects. You are involved in research, prototype testing, team brainstorm, concept presentations and further development.

As industrial design intern you will work on a wide range of products, which can vary from consumer products to medical equipment and solutions for mobility and the professional market.

You are a pro with Solidworks. You have good and communicative sketching skills and you are familiar with the Adobe software (Photoshop, Illustrator, Indesign) and Keyshot. Any experience or feeling with graphic design is a pre.

For more information about our design studio, visit our website: www.studiomango.nl

Would you like to apply for the internship?

Send us your portfolio in which you show us your skills! Make sure you show as much as possible of the design process and explain what your contribution was in each project.

To apply for the internship or if you have any questions, contact Melchior van Voorden at melchior@studiomango.nl.
