

INTERNSHIP AT WAACS

Our internships take 3-6 months and are open to industrial design students that are close to finishing their studies. Are you skilled in visualizing concepts and ideas and do you already know your way around in computer aided design tools such as SolidWorks, Keyshot and Adobe CC? Is it you who is going to support our design team in all kinds of project related tasks such as sketching, building models, CAD work and participating in brainstorm sessions?

We are looking for **talented designers** with a strong portfolio that shows passion, energy and promise. Candidates should have good interpersonal skills and at least one of the following qualities: **design talent, energy or charm.**

Applicants are strongly encouraged to provide a personal motivation and sample portfolio (PDF file or link to personal website). You may send your application to [career\[at\]waacs.nl](mailto:career[at]waacs.nl). Please do not send printed portfolios.

WE ARE WAACS

We help brands and companies to develop new products based on consumer insights. The people that use our products are our inspiration.

WHAT WE DO

We develop and design consumer products including user interfaces and structural packaging. We design medical braces and connected health devices. We design beer bottles and coffee makers. We develop products in plastic, metal, fabric, pixels or any other material or medium that suits best.

WORKING AT WAACS

Founded in 1992, WAACS has an established track record to build on, yet the average age is under 35. We combine the experience of a great history with the ambition of our young talent to contribute to innovations time and time again. We operate from a penthouse studio in heart of Rotterdam and develop products for brands from all over the world: from Reykjavik to Cape Town, from Redmond to Shanghai.
