

## **Campus tours for students - On Campus and Online**

Whether you are just starting to orientate yourself on your future studies, or whether you have almost made a choice and want to test whether your feelings are correct: the campus tours are the easiest and most fun way to explore the TU Delft campus yourself. There are two ways to participate in the campus tours, on Campus, where we naturally comply with the RIVM guidelines, and online. Whichever tour you choose; You will learn more about life at TU Delft and our campus. What is it like to take an exam? What does a study association do? What is an ECTS? You will hear it all during the campus tour. The [campus tour](#) is also a good way to get more basic information about some of the courses in a short time. If you want in-depth information about a specific study program, we recommend that you participate in the [online open day](#) or start a [chat with one of our students](#).

### **On Campus**

The physical campus tours start every Friday at 3 p.m. and last approximately 2 hours.

Please put on your walking shoes, we take you all over campus. The campus is less lively than usual at this time because most of the students follow online education, and we will not be able to enter all the buildings, but it does give you an idea of the place where you might be going to study.

Unfortunately, we cannot currently welcome parents or supervisors on the physical campus tours. The tours are also not yet suitable for disabled people.

### **Online**

If you prefer to participate in a campus tour from behind your computer, that is also possible. Every Tuesday at 4 p.m. our guides will take you along various faculties and other important places, using our virtual campus. It goes without saying that you can also ask questions to the guides during these tours.

### **Tours**

There are various tours available for the online campus tour and the physical campus tour. You choose one of these variants during registration. The following variants are available for English tours;

#### **Physical campus tour**

- o Tour D (English): Applied Earth Sciences, Computer Science and Technology, Nanobiology, Aerospace Engineering

#### **Online campus tour**

- o Tour 3 (English): Aerospace Engineering, Computer Science and Engineering, Nanobiology, Applied Earth Sciences
